Subsurface Stormwater Management Systems *Since 1986*

Typical CULTEC Stormwater System Components

1. **CULTEC Stormwater Chamber** - used for retention, detention, reclamation
2. **CULTEC HVLV[®] Feed Connector** - internal manifold component
3. **CULTEC Separator Row** - water quality row for TSS removal
4. **CULTEC No. 410[™] Non-woven Geotextile** - prevents soil intrusion into system
5. **CULTEC AFAB-HPF Woven Geotextile** - used in conjunction with Separator Row, placed under CULTEC manifold components, prevents scouring of stone base
6. **Stone** - used for stone base, embedment stone and stone above chambers
7. **CULTEC Warning Tape** - marks off location of underground CULTEC Stormwater System during construction to prevent vehicular traffic
