

CULTEC, Inc.

Landscaper Series™ for Residential Drainage

HVLV™ 180BT LS

Recharger® V8R LS

CULTEC's Landscaper Series™ chambers are used in residential applications to control rainwater collected from gutters and/or catch basins. The chambers collect and store the stormwater underground until the soil is able to accept it back into the ground. Puddles and saturated soil are eliminated as water is diverted into the chamber and recharged into the ground. CULTEC chambers are lightweight and easily transported by hand making them ideal to install in tight areas or where minimal site disturbance is desired.

CULTEC Plastic Chambers

- Control rainwater from gutters and driveway
- Help eliminate ponding
- Manage water from pool backwash
- Act as dry wells

System Benefits

- Large storage capacity
- Lightweight
- Can be carried by one or two people
- Easily transported by pick-up truck
- Straight-forward installation
- Minimal site disturbance

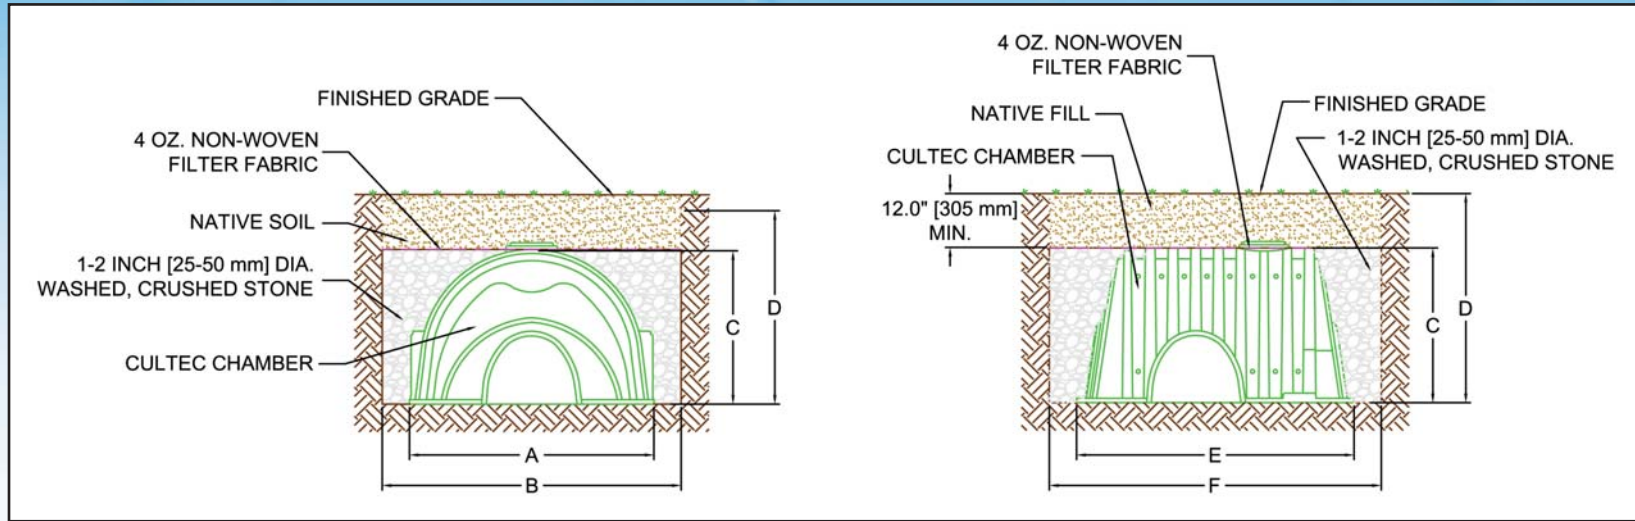

The Landscaper Series™ is not to be used in traffic areas. The chambers are for use in non-traffic applications only.

To find out about products which are available for traffic applications, contact CULTEC at 203-775-4416.
