Subsurface Stormwater Management Systems *Since 1986*

## Typical CULTEC Stormwater System Components

1. **CULTEC Stormwater Chamber** - used for retention, detention, reclamation
2. **CULTEC HVLV<sup>®</sup> Feed Connector** - internal manifold component
3. **CULTEC StormFilter<sup>®</sup> 330** - Water Quality Unit
4. **CULTEC No. 410<sup>™</sup> Non-woven Geotextile** - prevents soil intrusion into system
5. **CULTEC No. 4800<sup>™</sup> Woven Geotextile** - placed under CULTEC manifold components, prevents scouring of stone base
6. **Stone** - used for stone base, embedment stone and stone above chambers
7. **CULTEC Warning Tape** - marks off location of underground CULTEC Stormwater System during construction to prevent vehicular traffic
8. **Multicade Pylon** - marks location of underground CULTEC Stormwater System during construction phase
